

GRAIN-TECH™ SERIES

WOODGRAIN STAINABLE STEEL DOORS

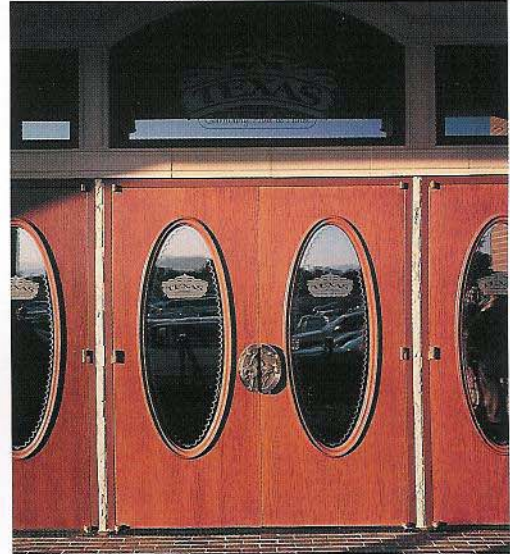

Even the most discriminating have to take a second look at our Grain-Tech™ Series stainable steel doors. Now, the beauty of real wood has been rendered amazingly close, in both color and finish. Our exclusive grain and staining process simulates wood with factory colors from Ash to Walnut. Specially formulated primer accepts stain so colors can be matched accurately to existing wood treatments, with frames and trim to match.

Unlike veneered or solid wood doors, the Grain-Tech™ Series is less susceptible to damage, and will never warp, crack, peel or bow. Plus, it meets the fire rating requirements of ASTM E152 for 20-minute to 3-hour doors. A large variety of hardware preparations can be made enabling the use of concealed or surface locks, exit devices and hinges; for a safer, stronger and more secure door—inside and out.

IDEAL USES:

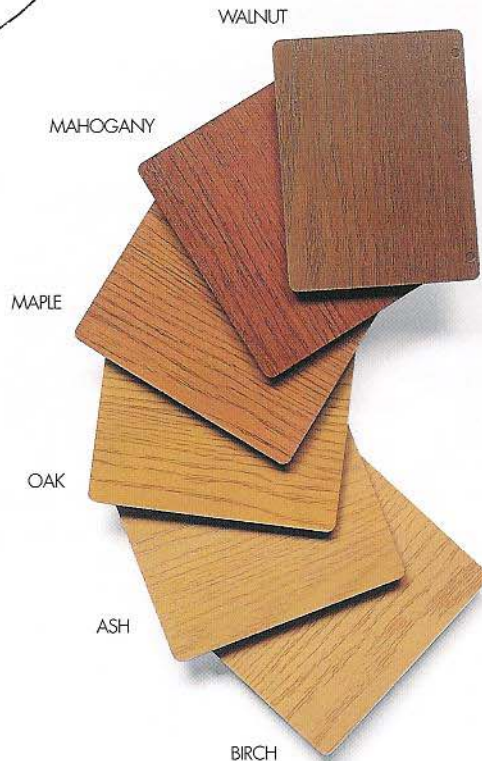

- > SCHOOLS
- > HOSPITALS
- > OFFICES
- > NURSING HOMES
- > APARTMENT BUILDINGS

20, 18 and 16-gage doors are available with an embossed grain pattern that can be field or factory stained to simulate a wood door. The door can be non-labeled or labeled flush design or can have any of the Steelcraft glass cutouts. The Designer Trim used in glass doors is supplied in the stainable steel material.

Grain-Tech™ Doors

There's nothing else like it.
